Euro-Asia Technology

Electrostatic Precipitator (ESP)

Commercial Kitchen/Industrial Exhaust Cleaning System

Air cleaners for mechanical processing and food industry

EURO ASIA

COMPANY PROFILE

| Company Profile |

About Euro-Asia

Euro-Asia is a leading Manufacturer, Supplier and Exporter of Electrostatic Precipitator (ESP), Air cleaners for mechanical processing and food industry with a factory in Taiwan. We supply and export consistently high class products and continually improve upon the manufacturing processes and work environment through total employee involvement and strict adherence to fair business ethics. We have gained several patents in the field. Our sincerity and hard work has helped us to match our quality with international standards.

The Best Equipment and Service

Our policy is to achieve customers' satisfaction both by providing them with high level air cleaner, exhaust system and services that meet or exceed their expectation. It is our force to manufacture products to suit the exact requirement of our client ranging from small industries to manufacturing units.

Our strength comes from working with our clients to identify their immediate needs. We don't stop until our client's requirements are fulfilled.

Service Range

Our products are extensively demanded in various automobile, engineering, textile and food industries and are tested before getting delivered to the clients end. (see the section of "Actual Result").

Every ESP product we manufacture is under strict quality management. Besides, our range of ESP is made by quality materials and according to the international quality standards. These are available in various specifications that best suit the varied requirements of our clients. We offer these to our clients at competitive prices in the industry. These are used in various industrial applications for their quality, excellent service, durability and optimum performance.

Green products – Green Solutions

Protecting our natural resources and the environment is one of our top priorities.With our green products we help every our customers become

▲ Euro-Asia's new office/factory will be completed at May. 10, 2014.

COMPANY PROFILE

a booster for protecting their environment. We have taken this approach because we view environmentally friendly as an opportunity to create value-for our environment, for us as a company and for our customers. We are committed to assisting our customers in understanding and measuring their environmental impact and how Euro Asia ESP & exhaust system can contribute to sustainably increasing energy efficiency and thus improving their carbon footprint and their contribution to protecting the environment.

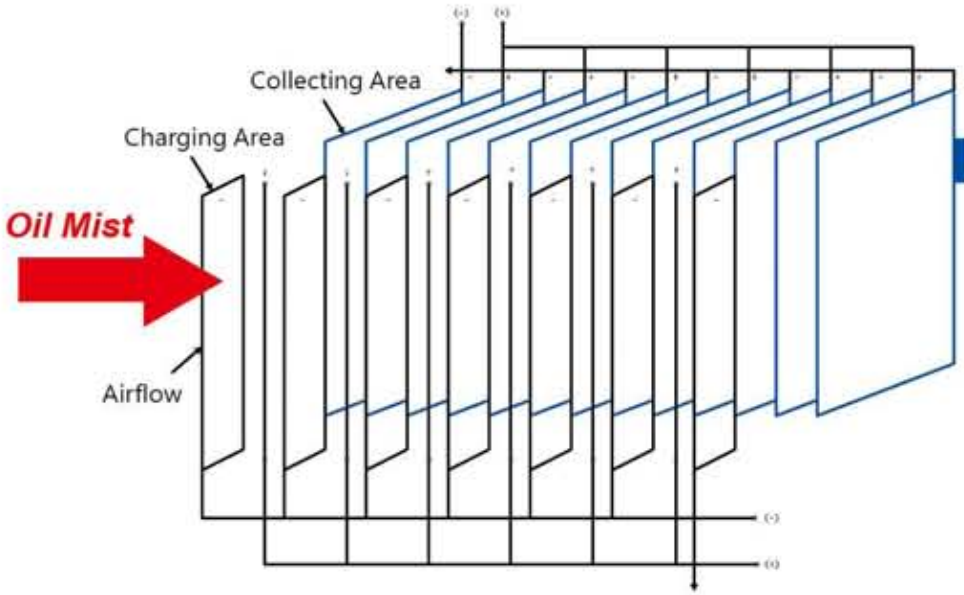
PRINCIPLE INTRODUCTION

The principle of electrostatic precipitator:

An electrostatic precipitator (ESP), or electrostatic air cleaner is a particulate collection device that removes particles from a flowing gas (such as air) using the force of an induced electrostatic charge.

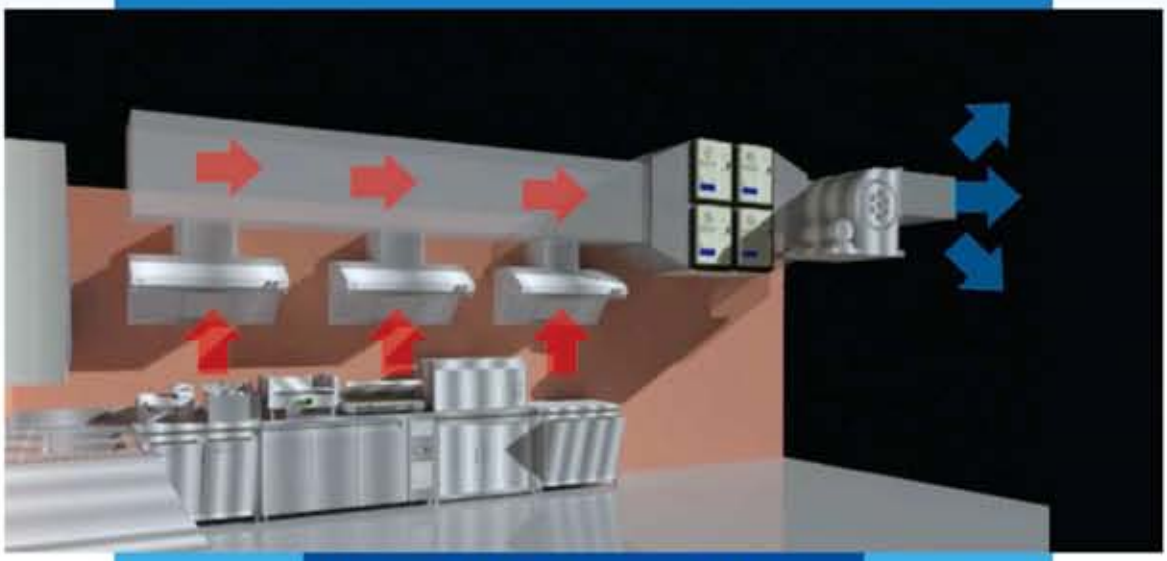
Electrostatic precipitators are highly efficient filtration devices that minimally impede the flow of gases through the device, and can easily remove fine particulate matter such as dust and smoke from the air stream.



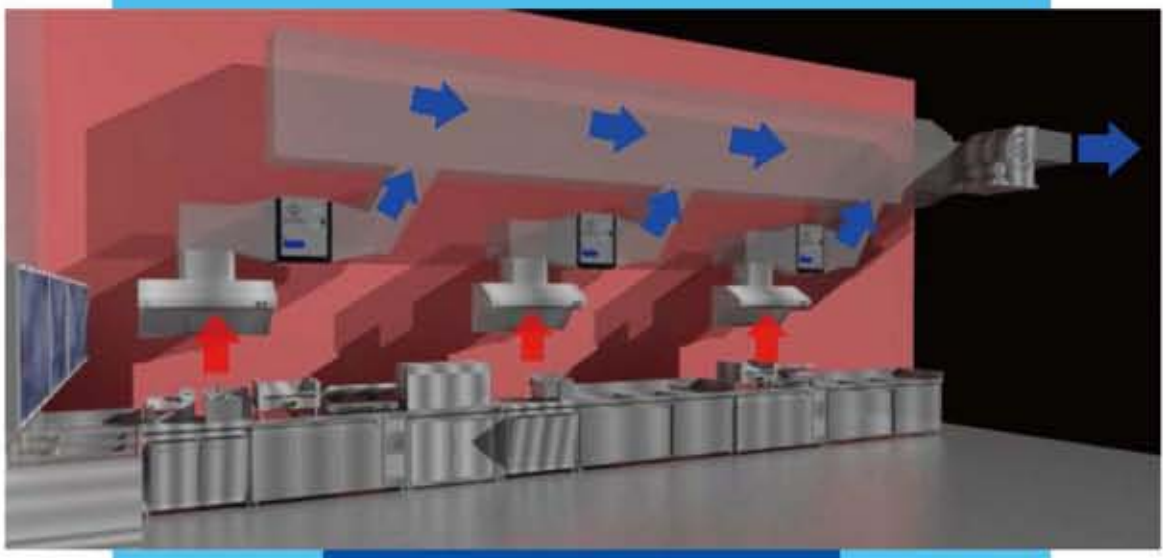
The Principle of Electrostatic Precipitator

High Voltage Power Pack

INSTALLATION ILLUSTRATION



Multiple hoods concentrate to process



Single hood separately processes

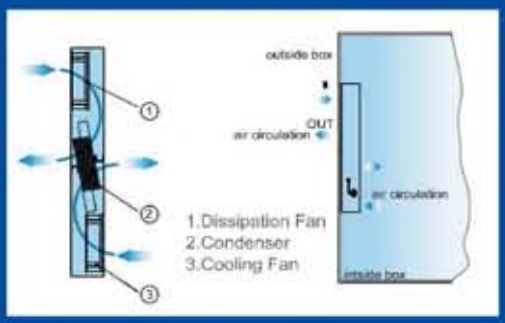
| Manufacturing Advantages |

Through 3D – CAD system with metal laser cutting and eyelet machine, production time can be reduced, and the customized products' ability and quality can be enhanced.

Every part of electrostatic precipitators is researched and developed by Euro-Asia's team, and they are all made in Taiwan, to ensure our quality to match international standard.

| Innovation of Heat Exchanger |

Heat exchanger circulation can remove the heat in the ESP Cabinet which is caused by long time operation, and high temperature of workplace. It could reduce the risk of breakdown, improve the stability of ESP cabinet, and increase productivity.



Features of Heat Exchanger

Testing Equipment

We have many kinds of testing equipment to make the right design and improvement for customers.

▲ Air meter

▲ Particle testing equipment

▲ Inner pipe anemometer

▲ Odor sampling

▲ Thermometer

| Leasing Program |

LEASING PROGRAM

The Advantages of Leasing Program

1.Tax Advantaged: The tax is spread out and paid along with your monthly lease payment instead of being paid all at once.

2.No repair cost.

3.No maintenance service cost.

4.Lower monthly payments.

5.CRM system reduce HR on managing ESP system

6.Your payment date – choose your annual payment due

We are thankful for the following enterprises adopt Euro-Asia's leasing program.

E-SERVICE SYSTEM

| E-Service System |

The Advantages of Euro-Asia's Customer Service Team

- The biggest team around the country
- Experienced and qualified technicians
- Experienced administration staffs
- Quick and high-efficient maintenance
- Warranty of high qualified working team
- Backup engineers with qualified licenses

The Best Service Team

In many situations, electrostatic precipitators can be one of the most crucial and the most valuable equipment. If they don't work in a proper environment, the quality result of the electrostatic precipitators may decrease, and customers may face the violation of local environmental law.

Euro-Asia's customer service team has high-experienced techniques and engineers with qualified licenses for keeping customers' electrostatic precipitators a best efficiency. With the fast and the most efficient speed, our team can solve customers' problems of oil mist treatment system.

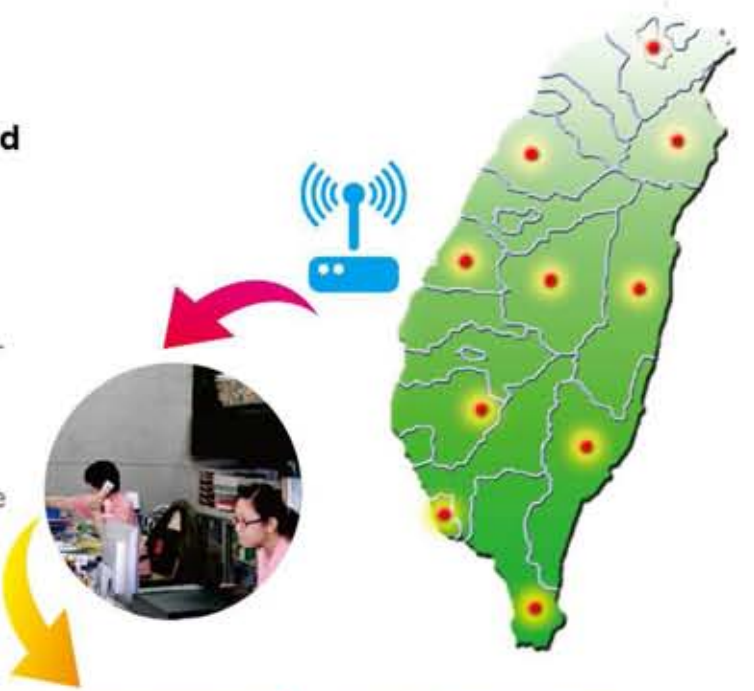
Euro-Asia's Customer Service Team

- Qualified Support Network
- Experienced Service Technicians
- Senior Administration Management
- Extensive Teamwork
- Cost Effective Solutions
- High Quality Work Team

For strengthening professional skills and increasing service quality, Euro-Asia holds monthly training and irregular training workshop.

GPS with Bluetooth Launched

In a perfect world, the accuracy should be absolute. Euro-Asia's technician service team is the first company to launch GPS into the new management system than other competitors within this industry. By using a wireless "Bluetooth" connecting with GPS that our technician service team can be more effective to serve an emergency case. It also enhances our service quality to meet our customers' requirements.



CRM (Customer Relationship Management) System

Euro-Asia's CRM system allows customers to track and search all the records of maintenance.

Every ESP unit from Euro-Asia has its own ID number, which allows our customers easy to track the maintenance history of units.
